LETTER OF REFERENCE

Mr. Bülent Cindil was working for MVV Consulting GmbH within the project "Promotion of Energy Efficiency in Buildings in Turkey" financed by the German Association of Technical Cooperation (GTZ). The project run from November 2002 to October 2005. The local partners of this projects have been the Turkish General Directorate of Electrical Power Resources Survey & Development Administration (EIE)/ National Energy Conservation Committee (NECC) and the City Administration of Erzurum.

The project was of high importance for the development and implementation of Energy Efficiency Standards and technologies in the residential building sector of Turkey.

The project comprised the following main components:

- Assistance to the development of national and regional building sector regulations,
- Development and implementation of demonstration projects on energy saving in buildings,
- Information and public awareness activities on energy saving in buildings,
- Establishment of local/regional energy management centres,
- Development of energy manager training centres.

MVV Consulting GmbH – Member of the MVV Group

Brussels
9, Avenue Jules César
B-1150 Brussels
Tel: +32-2-753 21 28
Fax: +32-2-770 10 41

The tasks of Mr. Cindil comprised:

- Demonstration projects: Engineering, supervision of implantation, measuring and monitoring,
- Networking: Stimulation of cooperation with local manufacturers, installation companies and technology applicants (such as housing associations),
- In-depth consultation of technology applicants,
- Establishment of the local energy management centre: conception, training of experts, business and training planning, management, service development, people relationships,
- Development of local energy management services: energy audits, building supervision, flue gas and other measurement,
- Economic assessments of energy saving measures for building construction and refurbishment,
- PR and dissemination of information: development of promotion material of the project and the Energy Management Centre, such as leaflets, newsletter, internet homepage and other media presentations.

He fulfilled these tasks in an excellent quality and in a self-responsible manner. Due to his degree in mechanical engineering and practical working experiences he contributed to the success of the project substantially.

His high level of motivation, reliability and availability as well as his communication / language skills are a real added-value of international and consulting projects.

Ankara, June 2005

Rainer Behnke

- Project director -
